## ListenPoint

Research has shown that students benefit significantly from the use of Sound-Field amplification systems in classrooms.

Powerful experiences, incredible details, sound that is so full, real and textured your students become part of every lesson. Those are the benefits you get with ListenPoint®

ListenPoint is a one-of-a-kind educational tool. This is a system that brings together multiple audio sources and puts anyone in the room right in the center of the sound. Every student is attentive and engaged. Instructors don't have to strain to be heard. Information is shared clearly and retention is increased, which is exactly what you want in any learning environment.

- Fits existing rooms
- Economical solution
- Expandable to cover "dead spots" and to meet BCA regulations\*
- Increased student attention, participation, interaction and achievement
- Greater student understanding
- Less distraction
- Reduced Teacher fatigue and vocal stress
- Support for multimedia sources
- Infra-Red Technology
- Improve:
  - ◆ Overall alertness
  - ◆ Participation
  - ◆ Attention span
  - ◆ Listening skills

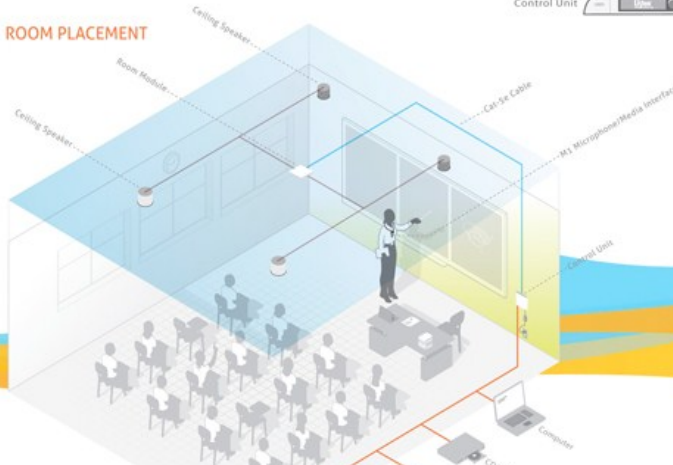

\*Optional Assistive Listening Module
